I do not write the confluence of events. But on Psychology Today, there is an article that may be a benefit to my own personal beliefs of mental health wellness treatment. BUT ATLAS, can I get a doctor to agree with me out of the conspiracy of secrets agenda in the HIV/AIDS treatments falling under the Ryan White Care Act and beyond..... there seems to be a detachment of these articles that can be brought forward respectfully into patient care. That is because there is a "obvious" interference observed in my very own mental health treatment or plans that are a diversion of patient wellness but intentioned to be a course of detached ethics on all parties of the mental health interfaces for persons with HIV/AIDS in my clinics's care., These have actual real evidence mentioned. First, the mental health director of the Foothill Aids Project is encouraged to deceive the client. That is the "standard of dysfunctional mental health wellness care" provided by the hate paradigm interface with Foothill Aids Project with a bias that allowed deception and diversion of the truth to be the standard instead of honesty and integrity.

When will this change?

Don't even let me get into the call recording that is mentioned in this record:

<http://doctor-nancy-ellen-m...> ---- where the call recording was made during a mental health session with University of Colorado Health staff embedded with the Infectious Disease Control unit of care. The call recording is available online with a zip password as noted on tweet history.

Can anyone be honest in all of HIV/AIDS patient care in the UNITED STATES OF AMERICA in the year of 2005,2006,2007,2008,2009,2010,2011,2012,2013,2014,2015,2016,2017,2018,2019,

So far I do not see any true good faith reasons to believe any fucking person of social services or doctor provider care that cannot be honest. They have a problem with telling the truth. Why is that?

Could the "magic mushrooms" drug help with anxiety, depression and addiction?

Posted Jun 13, 2019

Why should I trust you Dr. Farooqi, because you say your trustworthy?

Proof it..... have a real frank and honest discussion on how to hold an honest delivery of patient care in HIV/AIDS along with my mental health plan treatments that you are prescribing onto me.

Where is the sanity in allowing deception to be the standard, the status quo?

Where is the sanity in that?

Spam has commercial interests --- spam is spam ---- what I posted is not spam --- give me a break. Again the content moderator of this here ---- is suppressing the truth from being told. What a crock.

Create a discussion thread chain --- ask me why I am placing these real. These are real facts onto these matters.

I am not going to comply to nonsense ---- and that there is a predicament here --- this article is placed --- I asked Dr. Farooqi to watch this video from the beginning of our treatments.

I communicate via youtube --- animator presentations --- and there is absolutely nothing wrong with that.

Colorado Health Network ---- responsible for an 11-month hate an harassment campaign against me --- shown proven the chaos involved, violations of privacy of clients, gossiping mentalities, all reported on Glassdoor --- they are morally responsible --- but this is the status quo of the system region to region that must be terminated. If you mark this spam one more time ---- you are attempting to silence the truth.

After eviction, I have to deal with my hometown service area with this Google Review showing still --- Google it yourself --- Foothill Aids Project San Bernardino [look at the reviews]. Aaron Jacobson is an internal system opinion as being a member of the Inland Empire HIV Planning Counsel.

This agency is FRAUDULANT in its services and practices when it comes to serving the HIV population and utilizing Ryan White Funding. My recommendation for any HIV client interested in signing with them is to run as far and as fast as you can...they treat HIV consumers with contempt and unprofessionalism.

TO WHOM IT MAY CONCERN:

Mr. James Driskill has been a client of mine for Individual Psychotherapy since October 30, 2006. He has been attending Foothill AIDS Project's (FAP) "Living Well With HIV/AIDS" men's Support Group on a weekly basis since September 2006. He was self-referred for Individual Psychotherapy.

Mr. Driskill sought treatment for a high level of stress and anxiety primarily regarding his housing situation. He became homeless in Oakland earlier in 2006 and is currently residing with his family and extended Family in San Bernardino. In addition to his unresolved eviction in Oakland he was not able to secure immediate housing through the AIDS Housing Program in San Bernardino County due to a waiting period for each new applicant. These events resulted in Mr. Driskill experiencing a high level of anger and frustration.

While in both settings of therapy, Men's Support Group or Individual Psychotherapy, Mr. Driskill accepts the fact that he has an upfront, in your face style of confrontation. The men and I have come to realize that his style is primarily a reaction to his extreme level of frustration and we have learned not to be put off by his style. In these affirming settings he has learned to modify his style of confrontation which should continue to improve. I have also been impressed with how Mr. Driskill has sought out resources on how to understand and to cope more effectively while experiencing an almost complete lack of support from agencies and individuals. One such resource was the book "Please Understand Me: Character & Temperament Types", Kiersey, Davis and Bates, Marilyn.

His Mental Health and HIV Health status were both clinically affected by his housing crisis in Oakland and later in San Bernardino. He is currently responding well to the treatments

What is a NPI Number? : The National Provider Identifier (NPI) is a unique identification number for covered health care providers. The NPI is a 10-position, intelligence-free numeric identifier (10-digit number). This means that the numbers do not carry other information about healthcare providers, such as the state in which they live or their medical specialty. The NPI must be used in lieu of legacy provider identifiers in the HIPAA standards transactions. Covered health care providers and all health plans and health care clearinghouses must use the NPIs in the administrative and financial transactions adopted under HIPAA (Health Insurance Portability and Accountability Act).

Where NPI should be used? : The NPI must be used in place of legacy provider identifiers, such as a Unique Provider Identification Number (UPIN), Online Survey Certification & Reporting (OSCAR) and National Supplier Clearinghouse (NSC) in HIPAA standard transactions. There are two categories of health care providers for NPI enumeration purposes. Entity Type 1 providers are individual providers who render health care (e.g., physicians, dentists, nurses). Sole proprietors and sole proprietorships are Entity Type 1 (Individual) providers. Organization health care providers (e.g., hospitals, home health agencies, ambulance companies) are considered Entity Type 2 (Organization) providers.

Who must obtain NPI? : All health care providers who are HIPAA-covered entities, whether they are individuals (e.g., physicians, nurses, dentists, chiropractors, physical therapists, or pharmacists) or organizations (e.g., hospitals, home health agencies, clinics, nursing homes, residential treatment centers, laboratories, ambulance companies, group practices, Health Maintenance Organizations [HMOs], suppliers of durable medical equipment, pharmacies) must obtain an NPI. The NPI will be used by HIPAA-covered entities (e.g., health plans, health care clearinghouses, and certain health care providers) to identify health care providers in HIPAA standard transactions. A covered health care provider, under HIPAA, is any health care provider who transmits health information in electronic form in connection with a transaction for which the Secretary of Health and Human Services has adopted a standard, even if the health care provider uses a business associate to do so.
